DETAILED ACTION

Election/Restrictions

1. Applicant's election of claims 1-9,15,19-22,23,30,40-60,62,64,71, and 79-87 in the reply filed on 5/8/2008 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Furthermore, a restriction is required based on the elected claims
 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9,15,19-23,30,54-60,62,64,71, and 79-87 drawn to transmitting OFDM signals, classified in class 370, subclass 310.
 - II. Claims 40-53, drawn to converting OFDM signals to a new set of samples, classified in class 370, subclass 203.
 2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)).

In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because OFDM signals can be transmitted without converting the OFDM signals into a new set of samples.

The subcombination has separate utility such as improving data integrity and quality.

The examiner has required restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

1. Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.
2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
